

CONSTRUCTION/ARCHITECTS/STAINED GLASS

**Inspired Artisans –**

Inspired Artisans, Ltd. is a group of artisans devoted to the creation of liturgical art. As a multi-dimensional studio, we are able to work through projects from concept to installation, whether it's restoring existing elements, or developing original pieces, our goal is to satisfy the aesthetic and budgetary needs of our clients. Since 1997, Inspired Artisans has been creating art using such mediums as bronze, marble, wood, mosaic, fiberglass, terra cotta, clay, and etched, stained, and faceted glass throughout the United States as well as in Canada and the Galapagos Islands.

Past artwork commissions can be found throughout North America, Italy, Peru, and the Galapagos Islands, Ecuador.

Our old-world craftsmen have the insight and expertise to create artwork, which can become a focal point or subtle art in your building, drawing you into a room and complementing your building environment.

Liturgical fittings are custom designed or re-created for worship of all faiths.

Damaged or broken pieces are reverently repaired and enhanced.

Crosses, cruix, corpus and icons, murals and decorations are carefully designed, fabricated, painted, gilded and finished.

Restoration work is done by hand, using the finest materials available. We also create awards numbering from 1 piece to 100 pieces.

Stained glass work is done in the old-world craftsmanship style. Traditional, contemporary, prairie style and leaded work are some of the styles we use.

Inspired Artisans is a member of the Hispanic Chamber of Commerce, Catholic Cemetery Conference and the AISA Industry Partners.

## DIRECTORY OF LITURGICAL RESOURCES

### **Christoph Paccard Bellfoundries**

PO Box 1042, Charleston, South Carolina 29457

We design, install, and service cast bronze bell instruments for our clients. We work with our clients to understand their needs and desires in a bell instrument, then create solutions that work within the constraints, if any, of structure, space, and budget. Our design work incorporates planning for the possibility of future musical expansion of the instrument when possible, and additionally, for consideration of manual action in addition to electric action. We find more often than not that the consideration of a single bronze bell, peal, chime or cast bronze bell carillon is a first time experience for our clients. We are pleased to offer our expertise in evaluating the possibilities that are afforded by the site, and further, in bringing creative ideas forward for evaluation. One of our fortes is in helping to create an initial bell instrument, whether a single bronze bell, or a peal, with the goal in mind of making possible the future successful completion of an expanded instrument. We take pleasure in working with all of our clients to realize bell instruments, from concept to completion, that meet their needs and desires.

### **Patrick J. Murphy & Associates**

300 Old Reading Pike, Suite 1D Stowe, PA, 19464

USA Office: 610-970-9817 [info@pjmorgans.com](mailto:info@pjmorgans.com) Our primary goal is to professionally envision and construct new pipe organs and restore existing instruments that transcend the esthetic and artistic vision of our clients in a personable, knowledgeable, and practical manner.

A pipe organ is an individual artwork built by highly skilled artisans. Each instrument is designed for the room into which it will sing, after considering the architecture, acoustics and the liturgical and musical needs of the parish and its musicians. While modern organbuilders strive to take advantage of modern technology and materials, we remain committed to ancient principles and methods. The beauty and majesty of the pipe organ is, therefore, the product of the love and dedication of those who crafted it.
